

1. API Task - User Names Uppercase

API:

<https://jsonplaceholder.typicode.com/users>

```
fetch("https://jsonplaceholder.typicode.com/users")
  .then(response > response.json())
  .then(users > {

    let upperCaseUsers = users.map(user > {
      return user.username.toUpperCase();
    });

    console.log(upperCaseUsers);

  })
  .catch(error > {
    console.log("Error:", error);
  });
```

2. API Task - Expensive Products

API:

<https://fakestoreapi.com/products>

```
fetch("https://fakestoreapi.com/products")
  .then(response => response.json())
  .then(products => {

    let expensiveProducts = products.filter(product => {
      return product.price > 100;
    });

    console.log(expensiveProducts);

  })
  .catch(error => {
    console.log("Error:", error);
  });
```

3. Date Concept Task - Digital Clock

```
let currentDate = new Date();
```

```
let hours = currentDate.getHours();
```

```
let minutes = currentDate.getMinutes();  
let seconds = currentDate.getSeconds();  
  
console.log(hours + " : " + minutes + " : " + seconds);
```

Example Output:

10 : 45 : 30

4. String Concept Task - Username Checker

```
let username = " Naveen Kumar ";
```

Remove spaces

```
let trimmedName = username.trim();
```

Convert to uppercase

```
let upperCaseName = trimmedName.toUpperCase();
```

Check includes

```
let checkName = upperCaseName.includes("KUMAR");
```

```
console.log("Final Name:", upperCaseName);
```

```
console.log("Contains KUMAR:", checkName);
```

Output:

Final Name: NAVEEN KUMAR

Contains KUMAR: true

5. Array Concept Task - Student Rank System

```
let marks [450, 300, 700, 200, 900];
```

Sort high to low

```
let sortedMarks marks.sort((a, b) > b - a);
```

Top 3 marks

```
let topThree sortedMarks.slice(0, 3);
```

```
console.log("Sorted Marks:", sortedMarks);
```

```
console.log("Top 3 Marks:", topThree);
```

Output:

Sorted Marks: [900, 700, 450, 300, 200]

Top 3 Marks: [900, 700, 450]
