

Looping Statements & Functions

1. Print Numbers

Print numbers from 1 to 20

```
for (let i = 1; i <= 20; i++) {  
    console.log(i);  
}
```

2. Odd Numbers

Print odd numbers from 1 to 50

```
for (let i = 1; i <= 50; i++) {  
    if (i % 2 !== 0) {  
        console.log(i);  
    }  
}
```

Multiplication Table of 7

```
for (let i = 1; i <= 10; i++) {  
    console.log("7 x " + i + " = " + (7 * i));  
}
```

4. Reverse Counting using while loop

```
let num = 20;
```

```
while (num >= 1) {  
    console.log(num);  
    num--;  
}
```

5. Sum of Numbers from 1 to 100

```
let sum = 0;
```

```
for (let i = 1; i <= 100; i++) {  
    sum = sum + i;  
}
```

```
console.log("Total Sum =", sum);
```

Output: 5050

6. Array Loop

```
let fruits = ["apple", "banana", "orange", "grapes"];
```

```
for (let i = 0; i < fruits.length; i++) {  
    console.log(fruits[i]);  
}
```

7. Count Even Numbers

```
let evenCount = 0;
```

```
for (let i = 1; i <= 50; i++) {  
    if (i % 2 === 0) {  
        evenCount++;  
    }  
}  
  
console.log("Even Numbers Count =", evenCount);
```

Output: 25

8. Star Pattern

```
for (let i = 1; i <= 5; i++) {  
  
    let star = "";  
  
    for (let j = 1; j <= i; j++) {  
        star = star + "*";  
    }  
  
    console.log(star);  
}
```

Output:

```
*  
  
**  
  
***  
  
****  
  
*****
```

9. Simple Function

```
function welcome() {  
    console.log("Welcome to JavaScript");  
}  
  
welcome();
```

10. Function with Parameter

```
function greet(name) {  
    console.log("Hello " + name);  
}  
  
greet("Naveen");
```

Output: Hello Naveen

11. Add Two Numbers

```
function add(a, b) {
```

```
    return a + b;
}

console.log(add(10, 20));
```

Output: 30

12. Salary Bonus

```
function salaryBonus(salary, bonus) {
    return salary + bonus;
}

console.log(salaryBonus(50000, 5000));
```

Output: 55000

13. Object Loop using for in

```
let student = {
    name : "Rahul",
    course : "JavaScript",
    marks : 95
};

for (let key in student) {
    console.log(key + " : " + student[key]);
}
```

```
}
```

Output:

name : Rahul

course : JavaScript

marks : 95

14. Find Largest Number

```
function largest(a, b) {
```

```
    if (a > b) {
```

```
        return a;
```

```
    } else {
```

```
        return b;
```

```
    }
```

```
}
```

```
console.log(largest(10, 50));
```

Output: 50

15. Mini Employee Task

```
let employee = {
```

```
    name: "Amit",
```

```
    department: "IT",
```

```
    salary: 50000
```

```
};
```

```
function addBonus(salary, bonus) {  
    return salary + bonus;  
}  
  
console.log("Employee Name:", employee.name);  
console.log("Department:", employee.department);  
console.log("Salary:", employee.salary);  
  
let finalSalary = addBonus(employee.salary, 5000);  
  
console.log("Salary after bonus:", finalSalary);
```

Output:

Employee Name: Amit

Department: IT

Salary: 50000

Salary after bonus: 55000
